

# HIGH PITCH RETROFIT ROOF SYSTEM

Paramount Metal Systems high pitch roofing system is a practical and architecturally enhancing solution for existing, problem roofs. Our system can dramatically increase thermal efficiencies while the high pitch design adds to the visual appeal of any building.

## FEATURES & BENEFITS:

- The high pitch system utilizes the post and purlin or truss design to maximize steel efficiencies and provide a lightweight framing system over existing roofs.
- Flexible framing designs for single and double slope applications.
- Continuous base supports distribute the new roof loads evenly over existing framing members.
- In most cases, removing the existing roof is not necessary, saving costly demolition and disposal expense.
- Allows normal business to continue uninterrupted during retrofit construction.
- Additional insulation can be added to increase utility and equipment efficiency.
- Retrofit roof systems can add value to your building appraisals.
- Can be integrated with standing seam roofing panels (unexposed fasteners) to minimize potential leak problems or exposed fastener roof panels.
- Applicable trim packages are available to the desired roof framing plan are available.
- Galvalume® and pre-painted material warranties are available up to 30 years.

## TYPES OF USES:

Self-Storage | Schools | Office/Retail | Commercial/Industrial  
Hotels and Motels | Health Care Facilities | Canopies | Churches

# 800-505-9062

500 Pleasant Valley Drive | Building A | Little Rock, AR 72227
