

LOW PITCH RETROFIT ROOF SYSTEM

Paramount's low pitch retrofit roofing system provides an economical and aesthetic solution to "problem-leak" roofs. Installation is fast and normally completed without disrupting normal ongoing business inside the structure.

FEATURES & BENEFITS:

- Low pitch systems minimize field installation to reduce costly labor during the re-roof process.
- Metal re-roof systems can help increase the longevity of existing buildings.
- Flexible framing designs for single and double slope applications.
- Additional insulation can be added to increase utility and equipment efficiency.
- In most cases, removing the existing roof is not necessary, saving costly demolition and disposal expense.
- Retrofit roof systems can add value to your building appraisals.
- Recommended minimum pitch for framing and roofing 1/4" in 12".
- Standing seam panel systems for re-roofs can eliminate costly roof maintenance and repairs.
- Can be integrated with standing seam roofing (unexposed fasteners) to minimize potential problems or exposed fastener roofing panels.
- Applicable trim packages to desired roof framing plans are available.
- Galvalume® and pre-painted material warranties are available up to 30 years.

TYPES OF USES:

Self-Storage | Schools | Office/Retail | Commercial/Industrial
Hotels and Motels | Health Care Facilities | Canopies | Churches
