

# STEEL TRUSS AND WALL SYSTEMS

Paramount Metal Systems provides complete building services for the self-storage owner/developer and retrofit roofing systems for the commercial and industrial building industry. With value engineering and accurate estimating, Paramount ensures maximum efficiencies for large and small projects. Now Paramount can bring you a proven steel truss option. For new construction or retrofit systems, Paramount can provide a winning building solution.

## FEATURES:

- Unique chord shapes provide greater strength and rigidity for ease of handling, increasing building line consistency and higher section properties.
- Production and deliveries are usually much quicker than bar joist and build up section products.
- Trusses are compatible with steel studs, wood studs, structural steel, C.M.U. masonry and precast concrete.
- A variety of pitched roofs that meet non-combustible requirements are available.

## BENEFITS:

- Produced in strict accordance with national standards, providing consistent material quality.
- Stable dimensions will not expand or contract with moisture content.
- Non-combustible, does not contribute fuel to the spread of fire.
- Impenetrable to insects such as termites!
- Environmentally friendly – 100% recyclable!
- Has the highest strength to weight ratio of any building material.

## LIGHT GAUGE STEEL TRUSSES OFFER DESIGN FLEXIBILITY

Engineered light gauge steel truss systems offer superior strength and flexibility, combined with imaginative designs that provide better spanning capabilities. Project applications are virtually unlimited. With Paramount, you get a great product and commitment to service to ensure a successful project.

## TYPES OF USES:

Self-Storage | Schools | Office/Retail | Commercial/Industrial  
Hotels and Motels | Health Care Facilities | Canopies | Churches

# 800-505-9062
